**SUBJECT: Rancho California Water District Awarded \$40,000 to Provide  
Additional Data to Customers**

---

Temecula, CA September 18, 2018 –

Rancho California Water District (RCWD/District) has been awarded \$44,000 in federal funding assistance for an completing an upgrade to its MyWaterTracker tool. Designed to provide the District's customers with more frequent access to their water consumption data, the upgrade will allow customers to view one-hour snapshots of their water consumption every three hours and to create custom leak alerts that can be sent to them via text or email. The goal of the upgrade is to help customers conserve water by providing them with the data they need for detecting and fixing leaks in their pipes more quickly.

“The MyWaterTracker upgrade is another example of how the District continuously seeks out the latest technologies that will help our customers use water efficiently,” said Jeff Armstrong, General Manager. “It is also a testament to our overall commitment to making water conservation a way of life in California.”

###

***Formed in 1965, Rancho California Water District supplies an area consisting of approximately 150 square miles. The District serves the area known as Temecula/Rancho California, which includes the City of Temecula, parts of Murrieta, and other contiguous lands. The District is separated into two divisions: the Santa Rosa Division generally west of I-15 and Rancho Division generally east of I-15. The District currently provides sewer service to the Cal Oaks and Bear Creek areas.***

*“The mission of the Rancho California Water District is to deliver reliable, high-quality water, wastewater and reclamation services to its customers and communities in a prudent and sustainable manner.”*
